STATEMENT BY FIRM Since 1976, Plisga & Day has been offering a full range of Professional Land Surveying services. Currently we have 12 State of Maine licensed land surveyors most with more than 20 years experience. Because of our experience and professional staff we are able to turn smaller jobs around quickly while tackling larger boundary or measuring challenges that may span months or even years. Over the years we have completed thousands of jobs throughout the State of Maine. These jobs range from residential to commercial to government and often involve a client that we have worked for before. For example, for over 11 years we have worked on the perimeter boundaries of Acadia National Park. For paper companies, we have mapped hundreds of lease lots along Maine's lakes and rivers. For our forestry clients we have measured, cleared, and marked hundreds of miles of property lines. Our younger surveyors have professionally grown up in an environment of strong mentoring and peer review. Examples of our work products are available from our website at <http://www.wemapit.com/portfolio>; our services are listed at <http://www.wemapit.com/services> and our surveyors bios are available from <http://www.wemapit.com/about-us/about-us.html>.
